

# EcoFlush™

The super-low-flush WC  
that saves up to 80% water!

- Saves 80% water!

- 1 Litre per flush!

- Urine diverting WC

- Suitable also for septic tanks

EcoFlush™

Wostman

# EcoFlush is **Eco-friendly** and **Economical**!

EcoFlush is the perfect solution for saving water whilst still using a normal toilet. You can install it to either a traditional sewerage system or to your own individual septic tank. It fits a regular 110mm outlet, and you can choose to have a separate or combined outlet if you're using it with a septic tank.

## ≈ 300 ml

The small flush uses about 300ml of water. It comes from the front and gushes down the urine bowl continuing over the edge to the rest of the bowl for the highest possible hygiene.

## ≈ 2,5 Litre

The big flush uses about 2,5 litres of water. The force of the water comes from the back as well as the front and rinses the entire bowl.

## *Flush only where it's needed!*

By using a WC that is designed to separate waste, you are able to dramatically decrease the amount of water you use to flush. On average, a person will make 6 toilet visits a day. Since 5 of these visits will contain only urine, with EcoFlush you will be able to use the small flush most of the time (≈ 300 ml per flush). Including the big flush, the average consumption of water per person per day will then be ≈ 4 litres (this is less than a single flush for a low-flush toilet on the market). This means almost 90% saving..

Technical drawings of the toilet components. On the left, two side-view cross-sections show the 'Water trap' and 'Urine hose' with dimensions: 625 mm for the water trap and 350 mm for the urine hose. On the right, a top-down view of the toilet bowl shows a diameter of 350 mm.

### Details

**Water connection:** Flexible stainless 1/2", R15  
**Flush volumes:** Big flush: 2,5 L, Urine flush: 0,3 L  
**Average volumes / flush:** approx 1 Litre.  
**Urine piping:** 50mm, 50 mm adapter is included.  
**Feaces Piping :** Fits 110 mm.  
**Urine hose:** 19mm white, included. (mounted)  
**Toilet seat:** Standard seat white plastic included.
